

REMARKS

This Amendment is submitted simultaneously with filing of the divisional application.

In the parent application the Examiner applied a restriction requirement and requested to restrict the present application to one of two inventions, namely inventions drawn to a polyester yarn, and to a method of making polyester yarn.

In connection with the Examiner's restriction requirement, applicants have elected in the parent application the invention drawn to a polyester yarn and retained for further prosecution claims 1-3.

In the present application applicants intend to prosecute the second invention, namely the method of making polyester yarn. In connection with this, claims 1-3 have been canceled and claims 4 and 5 have been retained for further prosecution.

Consideration of the present application and its allowance is most respectfully requested.

Should the Examiner require or consider it advisable that the specification, claims and/or drawings be further amended or corrected in formal respects in order to place this case in condition for final allowance, then it is respectfully requested that such amendments or corrections be carried out by Examiner's Amendment, and the case be passed to issue. Alternatively, should the Examiner feel that a personal discussion might be helpful in advancing this case to allowance, he is invited to telephone the undersigned (at 631-549-4700).

Respectfully submitted,

Michael J. Striker
Attorney for Applicants
